**Back-end developer**  
Bridge-Zone (Информационные технологии / IT / Интернет)

As a backend developer at Bridge Zone, my responsibilities include designing, developing, and maintaining scalable server-side applications using Node.js. I manage our database systems with MongoDB, ensuring data integrity and optimized performance. I also create and implement RESTful APIs, facilitating seamless communication between the backend and frontend.

My achievements include significantly improving API response times, reducing server costs through efficient AWS management, and successfully leading a team to migrate legacy systems to a modern architecture. Additionally, I have contributed to enhancing security measures and streamlining the deployment process, ensuring robust and reliable backend operations.
